Job Description: WordPress Developer + Systems Administrator

We're Keokee, a media + marketing firm located in beautiful Sandpoint, Idaho ... and we're looking for a passionate WordPress Developer, with an aptitude in systems administration, to join our team! As a WordPress Developer at Keokee, you will be responsible for both back-end and front-end development, including creating WordPress themes and plugins.

We are expecting you to have a solid understanding of latest industry trends and content management systems. Experience is certainly a criteria - but we value aptitude, enthusiasm and a can-do attitude just as highly. The right candidates could be making a second-step career move or even be a fast learner starting out and eager to expand his or her skills with a grand variety of projects.

We offer competitive compensation for our market, with the opportunity to advance in the work and skills that are your passion. Vacation, paid holidays, a health care allowance and flexible schedule are among the benefits, along with a casual work environment in a company that just happens to be located in one of the neatest small towns anywhere. That is, assuming you might like to ski or snowboard at Schweitzer Mountain, enjoy watersports on magnificent Lake Pend Oreille, hike or bike the multiple mountain ranges surrounding town, or just appreciate Sandpoint's laid-back vibe and atypically fine arts-and-entertainment scene.

WordPress Developer duties and responsibilities

- Designing and implementing new features and functionality.
- Establishing and guiding the website's architecture.
- Ensuring high-performance and availability, and managing all technical aspects of the CMS.
- Helping formulate an effective, responsive design and turning it into a working theme and/or plugin.

WordPress Developer requirements and qualifications

- Good understanding of front-end technologies, including HTML5, CSS3, JavaScript, jQuery.

– OVER –

– MORE –

- Experience planning and building user interfaces for websites.
- Experience designing and developing responsive design websites.
- Comfortable working with debugging tools like Firebug and the Chrome inspector.
- Ability to understand CSS changes and their ramifications to ensure consistent style across platforms and browsers.
- Ability to convert comprehensive layout and wireframes into working HTML pages.
- An understanding of code versioning tools Git.
- Strong understanding of PHP back-end development.

Systems Administrator duties and responsibilities

- Maintain and monitor servers
 - Web hosting servers
 - Backup servers
 - File server
 - Mac and Windows workstations
- Troubleshoot office printers.

Systems Administrator requirements and qualifications

- Proficient with a full stack LAMP environment.
- Comfortable working in the linux terminal.
- Highly skilled at troubleshooting computer systems.
- An understanding of email deliverability.
- Email account setup and troubleshooting.

That sums up the skills and tasks for this position, but to all that add this: We're a small shop. Everyone here can get called on occasionally to lend a hand for anything.

And finally, as a key player in our company, we want you to contribute ideas and enthusiasm to help us find or create new opportunities for everything Keokee does... and succeed in all endeavors we undertake!

Want to apply? Email us, only, with your resume and a cover letter to: admin@keokee.com

We'll reply to confirm receipt of all applications. We hope to hear from you!
